

Limit by Referrer URL

11/07/2024 4:30 am EST

This restriction limits what URLs can have access to a specific integration. This means that this integration will only be accessible through the specified URLs.

Navigate to API Keys and click "Edit".

The screenshot displays the 'API Keys' management page in the Autoaddress interface. On the left, a sidebar menu includes options such as Dashboard, Reports, Integrations, API Keys (highlighted), API Status, Developer Hub, Support, My Account, Subscription, Profile, Manage Users, and Log out. The main content area is titled 'API Keys' and contains the text 'API Keys for your Integrations.' Below this is a table with the following data:

Integration	Key	Created	Restrict
New Integration	pub. [REDACTED]	20 Feb, 2024	Edit
Sample Integration	pub. [REDACTED]	24 Jan, 2024	Edit

A red arrow points to the 'Edit' button for the 'New Integration' row.

Add a URL and then press Save.
