

Shopify Plus Integration

09/11/2024 11:37 am EDT

Shopify Plus Installation

1. Search for **Autoaddress** in the Shopify app store or find us here: <https://apps.shopify.com/autoaddress-checkout>
2. Click **Install** and follow the instructions, then **select your subscription**. For each subscription type, we offer a 7-day free trial*.
3. Now, all that is left to do is to add the app into your checkout page. Navigate to your **Checkout Editor**, click **Add app block** (under the Delivery section) and select **Autoaddress Checkout UI**.
To ensure you get the most out of our app, make sure to disable *native address lookup* if it's enabled on your store**.

The screenshot displays the Shopify Checkout Editor interface. On the left, a sidebar menu shows the checkout layout with sections like Header, Contact, Delivery, Payment, and Order summary. The 'Delivery' section is expanded, showing 'Add app block' as an option. The main area shows the checkout form for 'My Store' with the following fields and options:

- Contact:** Email or mobile phone number (otto.donnelly@example.com), Email me with news and offers (checkbox).
- Delivery:** Country/Region (Ireland), First name (optional) (Otto), Last name (Donnelly), Address (Bedford Hall), Apartment, suite, etc. (optional) (34 Castle Street), City (Dublin), County (Dublin), Postal code (D02 TN97), Save this information for next time (checkbox).
- Shipping method:** Standard (Example) €10.00
- Payment:** All transactions are secure and encrypted.

4. Click **Save** and now the app is ready for use!

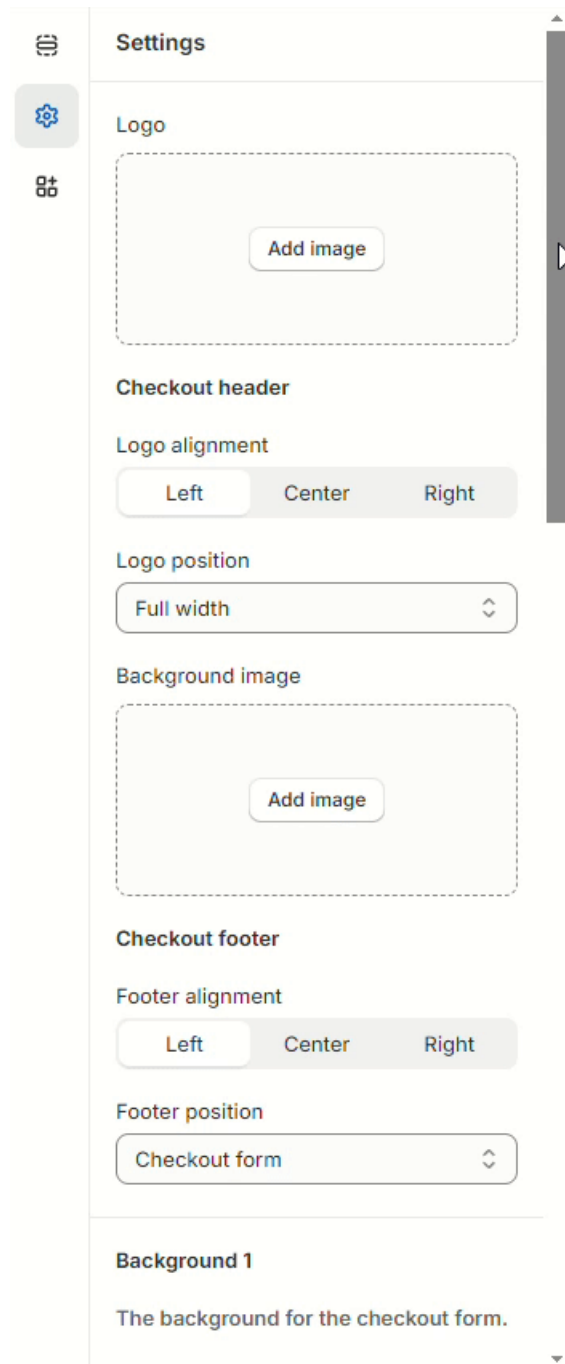

* For more information on the subscriptions, see FAQ section below

** See below for disabling the native address lookup

Disable native address lookup

Shopify provides a native address lookup, and to get the most out of the Autoaddress app, follow below steps to disable this:

- Go to the Settings page for your Shopify store
- Select the Checkout option from the left-hand menu
- On the *Customize your checkout* section, click the **Customize** button then the **Settings** icon on the left of the menu
- Scroll to the bottom and under the **Address autocompletion** heading, untick the option for *Use address autocompletion*, then click the Save button

Enable additional data

The Autoaddress app features additional settings which can simply be toggled on or off.

On your admin page, find Autoaddress under the Apps section then click *Configure extension* to see the additional settings.

Address settings

These settings control how we show addresses in our address suggestion list

- PO Box
Select to show PO box as addresses
- Organization/Business names
Select to show organization names in the address suggestion list

Character substitutions

These settings control the characters in our address lines we return to your checkout page

- Transliteration
Select to swap non latin characters with latin characters. Eg Θεσσαλονίκης 12 is swapped for Thessalonikis 12
- Fold to ASCII
Select to replace characters that are not in the Basic Latin Unicode block (first 127 ASCII characters). Eg café is swapped to cafe

Order metadata - advanced

These advanced settings control the data options we can pass to your order metadata

- Location Data
Select to return co-ordinates for addresses to be added to your order metadata. Additional charges apply.
For instructions on how to configure your orders for our co-ordinates, see instructions [here](#).

Cancel Save Settings

The available additional settings are:

- PO Box - Allows PO Boxes to show as addresses
- Organization/Business names - Allows organization names to appear as suggestions
- Transliteration - Swaps non-latin characters with latin characters
- Fold to ASCII - Replaces characters that are not in the Basic Latin Unicode block (first 127 ASCII characters)
- Location data - Returns co-ordinates for address

Add Order Metafield Definitions

Shopify provides the ability to customize data for a specific part of your store. Autoaddress can provide location data for your order object.

Once you turn on the Setting to retrieve location data, there are additional steps to ensure you get data returned.

To do this, navigate to Settings → Custom Data → Orders. Here you will see a button labeled "**View unstructured metafields**", click this.

Note: The button will only be visible if any new orders are made after turning on the setting. If there are no new orders made after enabling the setting, click "**Add definition**" and ensure

Namespace and key is labelled `custom.location_coordinates`
